Low Prep Strategies for Differentiating Instruction

Midwest Regional Association of Middle Level Educators Conference
October 17, 2008
Our teacher has an interesting theory...

She says teaching is like bowling.

All you can do is roll the ball down the middle and hope you touch most of the students.

She must be a terrible bowler!
Differentiation

• It means that you think proactively from the beginning, and the “normal” lesson includes more than one avenue for success.

• It means that you think about the diversity of your learners when you are planning and don’t ever again fall into the trap of thinking that “One size fits all.”
Differentiated Classrooms offer different approaches to…

CONTENT: What students learn

PROCESS: How they learn it

PRODUCT: How they demonstrate what they have learned
Differentiated tasks are created based upon a student’s:

- **READINESS** closely matched to skill level,
- but challenging,
- **INTERESTS** ignites curiosity and/or passion,
- **LEARNING** provides opportunities to open a door.
How?

Low Prep Differentiation

• Choices of Books
• Explorations by Interest
• Homework Options
• Flexible Seating
• Reading Buddies
• Computer mentors
Side by Side Reading
Side by Side Reading
Fiction/Nonfiction
Bud, Not Buddy

During the month of February, we will be reading *Bud, Not Buddy*. This historical fiction novel, written by Christopher Paul Curtis, is a time-piece set during The Great Depression Era/The Jazz Age. In order to fully grasp the setting and appreciate the plot, we need to familiarize ourselves with the time period. Therefore, you will read a nonfiction book to read "Side by Side" with *Bud, Not Buddy*.

You have a choice of the following topics:
1. The Great Depression (1929-1939)
2. The Jazz Age (impact, significance of the music on Americans)
3. Biographies of Important People
   - Herbert Hoover
   - Franklin Delano Roosevelt
   - J. Edgar Hoover
   - Al Capone
   - John Dillinger
   - Dorothy Dandridge
   - Duke Ellington
   - Count Basie
Graffiti Wall

- Pre-assessment of background knowledge
- On-going assessment for evidence of learning
- Summarization of key points taught
- Discussion board
- Results of a brainstorming session (i.e., Topics)
- Vocabulary building
- Your Idea Here~!
Think – Pair - Share

1. **Think** – The teacher provokes students’ thinking with a question or prompt or observation. The students should take a few moments just to **THINK** about the question.

2. **Pair** – Using designated partners, nearby neighbors, or a desk mate, students **PAIR** up to talk about the answer each came up with. They compare their mental or written notes and identify the answers they think are best, most convincing or most unique.

3. **Share** – After students talk in pairs for a few minutes, the teacher calls for pairs to **SHARE** their thinking with the rest of the class. Often, the teacher or a designated helper will record these responses on the board or the overhead.
Think – Pair - Share

Think about your answer. Write it down, if needed.

Select a Partner.

Listen to or explain answers.

Switch Roles.

State your answer in class discussion, a written assignment, or a speech.
Jigsaw Steps

- Assign Topics
- Expert Groups Meet
- Experts Consult
- Experts Create a Teaching Plan
- Experts Return to Teams to Share and Tutor
- Demonstration of Knowledge
Bloomin’ Questions
## Multiple Levels of Questions

<table>

<td>Determine Decide Judge Choose Recommend</td>
</tr>
</tbody>
</table>

- Have students write 1-2 questions from each level or 1-2 questions from the first 3 levels and 1-2 questions from the second 3 levels.
What are low-prep examples?

- Select two sets questions from the students’ textbook where some questions are common to both sets:
  - Target one set of questions for students who think they need more time to develop the concept;
  - Target the other set for students who think they are ready to apply the concept in new contexts.
Graphic Organizers

• Laminate posters and post them on the walls for students to refer to
• Put samples of forms in envelopes for students to access
Fill in the first two columns, then observe or read what happened, then fill in the last two columns.

Frayer Model

Directions: Complete the chart to show what you know about differentiation. Write as much as you can.
Colored Cups for Managing Groups

Green = we’re working fine!

Yellow = we need you here, but we can continue working.

Red = S.O.S. We need you right now; we’re stuck!

Upside down during task

Right side up when finished
Ask 3 Before Me

Students consult three other students or resources (e.g., Word Wall, front board) before coming to the teacher.
Answer Sheets

- Provide answer sheets for students to self-check handouts or textbook questions.
- Choose 1-2 students to be in charge of distributing and collecting them.
Homework Checkers

Background:
This is a process for checking multiple homework assignments simultaneously in a classroom so that the teacher feels free to differentiate homework as necessary to address particular student learning needs.

Steps:
1. The teacher checks to make sure each student has completed assigned homework.
2. Students who have not completed the assignment work in a designated area of the room to complete the assignment (teacher floats to provide guidance/feedback.
3. Students who completed the HW work in groups of 4 to check all 4 sets for agreement/disagreement.
4. All students mark each answer for agreement/disagreement as well as explanations of why an answer is wrong and how to make it right.
5. Students sign indicating agreement, staple set of 4 together, turn in.
6. Teacher spot checks, “grades” one per set.
Timer on Overhead

- Helps keep everyone on task.
- Gives time limit for teacher-led group and group working independently.
- Guides students to prioritize their work.
Reading Contract

Choose an activity from each shape group. Cut out your three choices and glue them below. You are responsible for finishing these activities by __________. Have fun!

This contract belongs to ________________________________
Make a poster advertising yourself as a good friend. Use words and pictures to help make people want to be your friend. Make sure your name is an important part of the poster.

Get with a friend and make a puppet show about a problem and the solution in your book.

Draw a picture of a problem in the story. Then use words to tell about the problem and how the characters solved their problem.

Make a two sided circle-rama. Use it to tell people what makes you a good friend. Use pictures and words and make sure your name is an important part of the display.

Get with a friend and act out a problem and its solution from your book.

Write a letter to one of the characters in your book. Tell them about a problem you have. Then have them write back with a solution to your problem.

Make a mobile that shows what makes you a good friend. Use pictures and words to hang on your mobile. Write your name on the top of the mobile in beautiful letters.

Meet with me and tell me about a problem and its solution from the story. Then tell me about a problem you have had and how you solved it.

Think about another problem one of the characters in your book might have. Write a new story for the book about the problem and tell how it was solved.
# A Planet Show & Tell

An example of differentiated summative assessment
Select one from the top row and one from the bottom row.

</table>
Kagen Chips

- Learning Chips are a terrific way to get students interacting over the learning topic!

- 12 different sets of chips with different topics (shown here are the Discussion and Thinking Chips)

http://www.kaganonline.com/Catalog/index.html
“Assessment should always have more to do with helping students grow than with cataloging their mistakes.”

Carol Tomlinson
Minute Paper

• In one minute, students identify the most significant (useful, meaningful, disturbing, etc.) things they learned during a particular session.
Pass the Ball

• The teacher asks a question and then throws a ball to the student who is to answer the question. If the student answers the question correctly, he/she gets to shoot a basket. If the student answers incorrectly, he/she needs to pass the ball to a teammate for assistance.
RSQC2

• In two minutes, students *recall* and list in rank order the most important ideas from a previous day's class;
• In two more minutes, they *summarize* those points in a single sentence,
• then write one major *question* they want answered,
• then identify a thread or theme to *connect* this material to the course's major goal.
Whip Around

- Teacher poses question.
- Students write response.
- Students read written responses rapidly, in specified order.
- Teacher takes notes.
- Develop closure/clarification/summary.
Quartet Quiz

• Teacher poses question.
• Students write/prepare response.
• Students meet in quads and check answers.
• Summarizer reports, “We know, We wonder”
• Teacher records on board.
• Closure/Clarification/Next steps
Whole Group Assessment

1. Place a card in each corner of the room with one of the following words or phrases that are effective ways to group according to learner knowledge.
   - Rarely ever
   - Sometimes
   - Often
   - I have it!
   - Dirt road
   - Paved road
   - Highway
   - Yellow brick road

2. Tell the students to go to the corner of the room that matches their place in the learning journey.

3. Participants go to the corner that most closely matches their own learning status and discuss what they know about the topic and why they chose to go there.

Yes/No Cards

- Using a 4x6 index card the student writes **YES** on one side and **NO** on the other.
- When a question is asked the students hold up **YES** or **NO**.

1. Ask the students if they know the following vocabulary words and what they mean.
2. Call out a word. If a student is holding a **YES** they may be called on to give the correct answer.
3. Remind them that if they don’t know the words it is OK because they will be learning them.
4. You can do the same thing with conceptual ideas, etc.

---

Fist of Five

Show the number of fingers on a scale, with 1 being lowest and 5 the highest.

Ask, How well do you feel you know this information?

5. I know it so well I could explain it to anyone.
4. I can do it alone.
3. I need some help.
2. I could use more practice.
1. I am only beginning.

Thumb It!

- Have students respond with the position of their thumb to get an assessment of what their current understanding of a topic being studied.
- Where I am now in my understanding of ______?

Up
I know a lot

Sideways
I know some

Down
I know very little

Weather Reports

Sunny skies—it’s clear to me!

Low clouds—I understand some, but not all.

Fog/Smog—I’m lost!
Colored Cards

Green Light – I’m ready to go!

Yellow Light – Slow Down!

Red Light – Stop! I need your help.
Windshield Check

- **Clear** – “I GET it!”
- **Bugs** – “I get it for the most part, but I still have a few questions.”
- **Mud** – “I still don’t get it!”
Exit Cards

On your Exit Card---

Explain the difference between **prime** and **composite** numbers. You may wish to give some examples of each as part of your explanation.
Exit Card—Social Studies

• What would you do if something or someone invaded your neighborhood? What would you do if something or someone invaded the neighborhood 20 minutes away?

• Why did I use the following words to introduce WWII—desperate, neighborhood, assist, defeat?
Exit Card—Algebra

• Draw a graph and label the “x” and “y” axes. Then, graph a line with the endpoints (3,5) (7,2). Graph a line with the endpoints (-3, -5) (7, 2)

• Provide two ways of writing the equation for a line.
Exit Card—Literature

• In thinking about “psychological metabolism,” why is this a good term to describe what we have been discussing today?

• In thinking about the Myers Briggs personality scales, what characters from *The Outsiders* match which trait?
3-2-1 Exit Card

• 3 things you learned
• 2 ways the information relates to you personally
• 1 question
Ticket out the Door

We have begun a study of author’s craft.

List and identify three examples of figurative language used in the novel *Morning Girl* by Michael Dorris.
Entry Card-Science

• In pictures and words, show me a lunar and solar eclipse.
• In thinking about eclipses, who are the key players?
• Why is the word POSITION so important?
3 Points I want to remember

This squares with my beliefs.

Here’s what’s going round.

This makes me wiggle in my seat.
