**Food Web**

A diagram that shows all the possible feeding relationships in an ecosystem.

---

**Herbivore**

Organism that eats plants.

---

**Omnivore**

An organism's role or job in the environment.

---

**Ecosystem**

Any living thing, can be a plant, animal, etc.

---

**Omnivore**

Process by which plants use the sun's energy to produce their own food.

---

**Herbivore**

Organism that eats plants.

---

**Omnivore**

Organism that eats both plants and animals.

---

**Ecosystem**

Any living thing, can be a plant, animal, etc.

---

**Omnivore**

Process by which plants use the sun's energy to produce their own food.

---

**Herbivore**

Organism that eats plants.

---

**Omnivore**

Organism that eats both plants and animals.

---

**Ecosystem**

Any living thing, can be a plant, animal, etc.

---

**Omnivore**

Process by which plants use the sun's energy to produce their own food.

---

**Herbivore**

Organism that eats plants.

---

**Omnivore**

Organism that eats both plants and animals.

---

**Ecosystem**

Any living thing, can be a plant, animal, etc.

---

**Omnivore**

Process by which plants use the sun's energy to produce their own food.

---

**Herbivore**

Organism that eats plants.

---

**Omnivore**

Organism that eats both plants and animals.

---

**Ecosystem**

Any living thing, can be a plant, animal, etc.

---

**Omnivore**

Process by which plants use the sun's energy to produce their own food.

---

**Herbivore**

Organism that eats plants.

---

**Omnivore**

Organism that eats both plants and animals.

---

**Ecosystem**

Any living thing, can be a plant, animal, etc.

---

**Omnivore**

Process by which plants use the sun's energy to produce their own food.

---

**Herbivore**

Organism that eats plants.

---

**Omnivore**

Organism that eats both plants and animals.

---

**Ecosystem**

Any living thing, can be a plant, animal, etc.

---

**Omnivore**

Process by which plants use the sun's energy to produce their own food.

---

**Herbivore**

Organism that eats plants.

---

**Omnivore**

Organism that eats both plants and animals.

---

**Ecosystem**

Any living thing, can be a plant, animal, etc.

---

**Omnivore**

Process by which plants use the sun's energy to produce their own food.

---

**Herbivore**

Organism that eats plants.

---

**Omnivore**

Organism that eats both plants and animals.

- **Herbivore**: Ecosystem
- **Organism**: Any living thing that can be a plant, animal, etc.
- **Food Web**: Diagram that shows all the possible feeding relationships in an ecosystem.
- **Omnivore**: Process by which plants use the sun's energy to produce their own food.
- **Producer**: Group of organisms that depend on each other.
- **Sun**: Source of energy for food chains and webs.
- **Arrow**: Diagram that shows the flow of energy within a food chain or web.
- **Carnivore**: Organism that eats only consumers.
- **Extinction**: Organism that breaks down dead organisms.
- **Examples of Omnivores**: Human or Grizzly Bear
- **Example of a Consumer**: Organism that is killed by a predator.
- **Lion**: Organism that hunts and kills its prey for energy.

**Food Webs Elementary Vocabulary Puzzle v 3** — Cut apart, have students put the puzzle back together. Pictures do not show directionality.
